DETAILED ACTION

Specification

The specification is objected to for not including section headings.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Appropriate correction is required.

Claim Objections

Claims 1-6 are objected to because of the following informalities:

Claim 1 appears to be a preamble claim without a claim body. The claim should be rewritten in such a way as to differentiate the body of the claim from the preamble. In addition, a goal to “a data transmission system” is set forth in the preamble. However, the claim does not recite any structure or component(s) associated with the “data transmission system”.

The same comment applies to claims 2-6.

Claim 2 recites the limitation "the attenuation value" in line 2. It is suggested the phrase "the attenuation value" be changed to —the attenuation having a value that produces a stop of transmission of the first data—.

Claim 3 recites the limitations “the channel CPICH” in line 2 and “the channel SCH” in line 3. It is suggested the phrase “the channel CPICH” be changed to — a Common Pilot Channel (CPICH)—. Furthermore, it is suggested the phrase “the channel SCH” be changed to — a Synchronization Channel (SCH)—.

Claim 4 can be improved by rewriting the same, for instance, as follows:

—4. The transmission system according to claim 1 further comprising:

a receiver, wherein the receiver comprising a plurality of correlators configured to correlate the received data with locally generated spreading codes.—

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The specification of the type "3G TS 25.211" is vague and indefinite as specification is subject to change.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by SAMSUNG ELECTRONICS CO LTD (WO 00/70803 cited in IDS mailed April 10, 2002).

Regarding claim 1; SAMSUNG teach all the claimed subject matter "second data transmitted during a transmission attenuation of the first data", in page 10 lines 25-26 and page 11 lines 32-33.

Regarding claim 2; SAMSUNG further teach the claimed subject matter "stop of the transmission", note page 11, lines 32-33.

Regarding claim 3; SAMSUNG further teach the claimed subject matter "CPICH and the second data to the channel SCH", note FIG. 16A.

Art Unit: 2637

Regarding claim 4; SAMSUNG further teach the claimed subject matter "receiving device...re-assembling the transmitted data", note FIG. 20C.

Regarding claim 5, see claim 1.

Regarding claim 6, see claim 2.
